TO GOD BE THE GLORY

The mission of Jesus Coin is to influence culture and be a light in dark places by pioneering a decentralized, faith-based ecosystem that will inspire people to love one another and seek a higher calling.

Jesus Coin is a cryptocurrency (ERC-20) that was created to encourage generosity, foster community, and transform charitable giving. It was launched without a team allocation and is run entirely by the community.

USES

Jesus Coin was created to be the "anti-meme coin". A protest against all the scams, rug pulls, and dishonest crypto projects.

It was built on three tenets:
Fellowship: Community gatherings that are full of positivity and love

Discipleship: Mentoring and supporting members of the community with similar values

Stewardship: Encouraging holders to be generous with their time and resources

Through these tenets, community members seek to radically change the entire crypto ecosystem.

ROADMAP

- Grow our "Sunday Service" into a high-production live show (with token-gated elements)
- Develop an open-source "round-up to charity" smart contract function to be used for giving and/or tips
- Build a dAPP to facilitate charitable giving for non-profits in web2 and web3
- Expand the ecosystem with an e-commerce store (with exclusive perks for holders)
